

Certificate Course in Embedded System Design

Certificate Course in Embedded System

4 Weeks Online Course

Objective

To mould fresh electronics engineers and to up skill working engineers into High caliber Embedded System Designers by enhancing their knowledge and skills in various hardware and software design aspects of Embedded Systems. This course offers a range of topics of immediate relevance to industry and makes the students exactly suitable for industries engaged in Embedded System development.

B.E/ B.Tech. / Diploma (in Electrical/ Electronics/ Instrumentation) (Qualified or Pursuing) or O/A Level course qualified with basic knowledge of C programming

Eligibility

Duration

04 Weeks (2 Hrs. per day)

- ✓ Candidate must have latest computer/laptop with preferably 4 GB RAM or higher and Windows7/Windows10 O.S.
- ✓ Internet connection with good speed (preferably 2Mbps or higher)

Prerequisite

Certificate

Participation Certificate will be provided to the participants, based on minimum 75% attendance and on performance (minimum 50% marks) in the online test, conducted at the end of the course.

Rs. 3000/- incl. GST & all other charges.

Course Fees

How to Apply?

- ✓ **Step-1:** Read the course structure & course requirements carefully.
- ✓ **Step-2:** Visit the Registration portal and click on apply button.
- ✓ **Step-3:** Create your login credentials and fill up all the details, see the preview and submit the form.
- ✓ **Step-4:** Login with your credentials to verify the mobile number, email ID and then upload the documents, Lock the profile and Pay the Fees online, using ATM-Debit Card / Credit Card / Internet Banking / UPI etc.

Course Content

Day	Topic	Day	Topic	Day	Topic
Day #01	Introduction to Embedded Systems	Day #02	Classification of Embedded Systems, Architecture of Embedded Systems, Design issues of Embedded Systems	Day #03	Introduction to Microprocessor and Microcontrollers
Day #04	8 bit Microcontroller Architecture	Day #05	Introduction to Embedded C	Day #06	Microcontroller Programming using Embedded C
Day #07	Interfacing with LED & 7 segment display	Day #08	Interfacing of LCD display with Microcontroller	Day #09	Interfacing of Stepper Motor & DC Motor with Microcontroller
Day #10	Interfacing of A/D & D/A converter with Microcontroller	Day #11	Introduction to ARM Microcontrollers and Features	Day #12	ARM Microcontroller Architecture
Day #13	Driving RGB LED GPIO and 7 segment display	Day #14	Driving DC Motor thru PWM Signaling	Day #15	Interfacing Of LPC 2138 with Graphics LCD
Day #16	Implementing CAN Protocol using LPC 1768	Day #17	Implementing Ethernet Protocol using LPC 1768	Day #18	Interfacing Of LPC 2138 with RTC
Day #19	Django Middleware, Session & cookies	Day #20	Feedback and Final Assessment
