

## Cyber Security using Python

**Cyber Security using Python**  
**4 Weeks Online Course**

**4 Weeks / 60 Hrs. (3 Hrs. per day)**  
**Batch Size: 20 (Limited Seats)**

**Medium of Instruction: Bilingual (English & Hindi)**

### Objective

This course is designed with the aim to gain the knowledge of Python Programming and its applications in cyber security. Students will gain hands-on experience in writing Python scripts to automate security tools, conduct ethical hacking tasks, and simulate cyber defence mechanisms.

Graduation\*(in Any Stream), Diploma\*, NIELIT O/ A Level\* having basic knowledge of programming (\*pursuing candidate may also apply)

### Eligibility

### Course Fees

Rs. 1800/- incl. GST & all other charges.

- ✓ Candidate must have latest computer/laptop with at least 4 GB RAM.
- ✓ Internet connection with good speed (preferably 2 Mbps or higher)
- ✓ Candidate must have basic knowledge of Programming & Networks.

### Prerequisite

### Certificate

Certificate will be provided to the participants, based on minimum 75% attendance and on performance (minimum 50% marks) in the online test, conducted by NIELIT Gorakhpur, at the end of the course.

**Step-1:** Read the course structure & course requirements carefully.

**Step-2:** Visit the Registration portal and click on apply button.

**Step-3:** Create your login credentials and fill up all the details, see the preview and submit the form.

**Step-4:** Login with your credentials to verify the mobile number, email ID and then upload the documents, Lock the profile and Pay the Fees online, using ATM-Debit Card / Credit Card / Internet Banking / UPI etc.

### How to Apply?

### Salient Features

Instructor Led Online Training

E-Learning Contents

Hands on Lab

Self-Assessment

Real World Demo

**Course Content**

Day	Topic	Day	Topic	Day	Topic
Day #01	Cyber Security, Importance, Common Threats, CIA Triad, Ethical Hacking, Legal & Ethical Aspects	Day #02	Python in Cyber Security, Installing Python, VS Code Setup, Virtual Environment, Jupyter Notebook Installation	Day #03	First Python Script, Installing Cyber Security Libraries with pip
Day #04	Variables, Data Types, Input/Output, Conditions, Loops	Day #05	Functions, Exception Handling, Working with Modules, math, random, sys	Day #06	File Handling, Directory Traversal, OS Commands, Log Parsing, OS Libraries
Day #07	Basic Networking Concepts, IP Addressing, Subnetting & CIDR, Routing vs Switching, NAT, DHCP, DNS	Day #08	Networking Tools (ping, traceroute, etc.), Protocol Layers (TCP/IP model), ipaddress, socket, netifaces	Day #09	TCP and UDP Sockets, Server & Client Programs, IP Scanning, Simple Chat App
Day #10	Packet Structure & Sniffing, Real-time Capture, Parsing & Export, scapy tools	Day #11	Hashing & Encryption (MD5, SHA-256, AES, RSA), Password Security, cryptography libs	Day #12	HTTP Basics, Sending Requests, HTML Parsing, Form & Login Automation, requests, BeautifulSoup, selenium
Day #13	WHOIS Lookups, DNS Records, IP Geolocation, Subdomain Enumeration, whois, dnspython, ipwhois, shodan	Day #14	TCP Port Scanning, UDP Scan Basics, Banner Grabbing, Integration with Nmap, socket, nmap, masscan	Day #15	Dictionary Attacks, Login Form Automation, SSH/FTP Login Scripts, paramiko, ftplib, selenium
Day #16	Capturing Keystrokes, Saving Logs, Demo & Prevention Awareness, pynput, keyboard	Day #17	Monitoring Logs/Packets, Pattern Detection, Alert Mechanisms, scapy, os, re, time	Day #18	Secure Coding, Malware Analysis, Input Validation, XSS & SQLi Demos, flask, sqlite3
Day #19	Social Media OSINT, Tweet/Reddit Data, No-API Scraping, Sentiment & Hashtag Analysis, Visualization Tools	Day #20	Final Project Implementation, Debugging, Presentation and Demonstration		

**COURSE COORDINATOR**

Abhinav Mishra  
Joint Director (T)  
NIELIT Gorakhpur

**Mobile Number: 8317093868**

**Course Details**

S.No	Topic to be Covered
1	<b>Introduction to Cyber Security and Python</b> <ul style="list-style-type: none"> <li>What is Cyber Security</li> <li>Importance of Cyber Security in the Digital Age</li> <li>Common Threats in Cyber Security <ul style="list-style-type: none"> <li>Malware</li> <li>Phishing</li> <li>Ransomware</li> <li>Denial-of-Service (DoS)</li> <li>Man-in-the-Middle (MitM)</li> </ul> </li> <li>CIA Triad – Confidentiality, Integrity, Availability</li> <li>Ethical Hacking Overview</li> <li>Legal and Ethical Aspects</li> <li>Role of Python in Cyber Security <ul style="list-style-type: none"> <li>Automation</li> <li>Scripting for Attacks and Defense</li> <li>Real-World Use Cases</li> <li>Examples of Capabilities (e.g., file handling, system interaction, network scanning)</li> </ul> </li> </ul>
2	<b>Setting up Python Environment</b> <ul style="list-style-type: none"> <li>Installing Python (latest version recommended: Python 3.10+)</li> <li>Installing and Customizing Visual Studio Code (VS Code) <ul style="list-style-type: none"> <li>Python Extension</li> <li>Code Runner</li> <li>Terminal access</li> <li>Folder/project management</li> <li>Git integration (for version control)</li> </ul> </li> <li>Installing Python via Windows Store / python.org</li> <li>Creating Virtual Environment (using venv)</li> <li>Installing Jupyter Notebook (via pip)</li> <li>Writing and Running First Python Script</li> <li>Installing Key Python Libraries Using pip</li> <li><b>Common libraries to install for Cyber Security:</b> <ul style="list-style-type: none"> <li>- requests – Web interaction</li> <li>- beautifulsoup4 – Web scraping</li> <li>- scapy – Packet manipulation/sniffing</li> <li>- nmap / python-nmap – Network scanning</li> <li>- paramiko – SSH automation</li> <li>- pwntools – Exploit development</li> <li>- dnspython – DNS queries</li> <li>- flask – Web app (e.g., phishing simulation)</li> <li>- mitmproxy – Interception proxy for HTTP/HTTPS</li> <li>- cryptography – Hashing and encryption</li> <li>- argparse – Command-line interfaces</li> </ul> </li> </ul>

3	<b>Python Programming Essentials</b> <ul style="list-style-type: none"> <li>Variables, Data Types, Input/Output</li> <li>Conditions, Loops, Functions</li> <li>Exception Handling</li> <li>Working with Modules</li> <li><b>Python Libraries:</b> math, random, sys</li> </ul>
4	<b>File Handling and OS Interaction</b> <ul style="list-style-type: none"> <li>Reading/Writing Files</li> <li>Directory Traversal</li> <li>OS-level Commands Execution</li> <li>Log File Parsing</li> <li><b>Python Libraries:</b> os, shutil, pathlib, subprocess</li> </ul>
5	<b>Network Primer</b> <ul style="list-style-type: none"> <li>Basic Networking Concepts</li> <li>IP Addressing (IPv4 vs IPv6)</li> <li>Subnetting &amp; CIDR</li> <li>Routing vs Switching</li> <li>NAT, DHCP, DNS</li> <li>Networking Tools: <ul style="list-style-type: none"> <li>- ping, traceroute, ipconfig, ifconfig, netstat, nslookup, dig</li> </ul> </li> <li>Understanding Protocol Layers (TCP/IP model)</li> <li><b>Python Libraries:</b> ipaddress, socket, subprocess, netifaces</li> </ul>
6	<b>Networking with Python</b> <ul style="list-style-type: none"> <li>Sockets (TCP, UDP)</li> <li>Server &amp; Client Programs</li> <li>IP Scanning</li> <li><b>Python Libraries:</b> socket, ipaddress</li> </ul>
7	<b>Packet Sniffing &amp; Wireshark-like Implementation</b> <ul style="list-style-type: none"> <li>Understanding Packets (Ethernet, IP, TCP/UDP, HTTP)</li> <li>Real-time Packet Capture</li> <li>Packet Parsing</li> <li>Displaying Headers like Wireshark</li> <li>Exporting to .pcap or readable formats</li> <li><b>Python Libraries:</b> scapy, socket, dpkt (optional advanced parsing)</li> </ul>
8	<b>Cryptography &amp; Hashing</b> <ul style="list-style-type: none"> <li>Hashing (MD5, SHA-256)</li> <li>Symmetric Encryption (AES)</li> <li>Asymmetric Encryption (RSA)</li> <li>Password Hashing &amp; Salting</li> <li><b>Python Libraries:</b> hashlib, cryptography, pycryptodome, bcrypt</li> </ul>
9	<b>Web Scraping &amp; Automation</b> <ul style="list-style-type: none"> <li>HTTP Basics</li> <li>Sending Requests</li> <li>Parsing HTML</li> <li>Auto-filling Forms / Login Automation</li> <li><b>Python Libraries:</b> requests, BeautifulSoup, selenium</li> </ul>

10	<b>OSINT &amp; Reconnaissance</b> <ul style="list-style-type: none"> <li>• WHOIS Lookups</li> <li>• DNS Records</li> <li>• IP Geolocation</li> <li>• Subdomain Enumeration</li> <li>• <b>Python Libraries:</b> whois, dnspython, ipwhois, shodan (optional)</li> </ul>
11	<b>Port Scanning &amp; Vulnerability Detection</b> <ul style="list-style-type: none"> <li>• TCP Port Scanning</li> <li>• UDP Scan Basics</li> <li>• Banner Grabbing</li> <li>• Integration with Nmap</li> <li>• <b>Python Libraries:</b> socket, nmap (with python-nmap), masscan (via subprocess)</li> </ul>
12	<b>Brute Force &amp; Credential Testing</b> <ul style="list-style-type: none"> <li>• Dictionary Attacks</li> <li>• Login Form Automation</li> <li>• SSH/FTP Login Scripts</li> <li>• <b>Python Libraries:</b> paramiko (for SSH), ftplib, selenium</li> </ul>
13	<b>Keylogging (Awareness Only)</b> <ul style="list-style-type: none"> <li>• Capturing Keystrokes</li> <li>• Saving Logs</li> <li>• Demo &amp; Prevention Awareness</li> <li>• <b>Python Libraries:</b> pynput, keyboard</li> </ul>
14	<b>Intrusion Detection Basics</b> <ul style="list-style-type: none"> <li>• Monitoring Logs/Packets</li> <li>• Pattern Detection (Rule-based)</li> <li>• Alert Mechanisms</li> <li>• <b>Python Libraries:</b> scapy, os, re, time</li> </ul>
15	<b>Secure Coding &amp; Malware Awareness</b> <ul style="list-style-type: none"> <li>• Secure Input Handling</li> <li>• Avoiding Common Attacks</li> <li>• Static Malware Analysis</li> <li>• File Integrity Verification</li> <li>• <b>Python Libraries:</b> hashlib, os, re</li> </ul>
16	<b>Web Application Security</b> <ul style="list-style-type: none"> <li>• XSS and SQL Injection Demos</li> <li>• Securing Forms</li> <li>• Preventing Code Injection</li> <li>• <b>Python Libraries:</b> flask (for demo apps), html (escaping), sqlite3</li> </ul>

17	<b>Social Media Analysis for OSINT</b> <ul style="list-style-type: none"><li>• Social Media in Cyber Threats</li><li>• Collecting Tweets using tweepy</li><li>• Reddit Data via praw</li><li>• No-API Scraping using snsrape</li><li>• Sentiment Analysis</li><li>• Hashtag Alerting</li><li>• Visualization</li><li>• <b>Python Libraries:</b> tweepy, praw, snsrape, TextBlob, nltk, vaderSentiment, matplotlib, seaborn, wordcloud</li></ul>
18	<b>Project Development</b> <ul style="list-style-type: none"><li>• Planning &amp; Designing</li><li>• Testing &amp; Documentation</li><li>• Presentation Preparation</li></ul> <b>Project ideas:</b> <ul style="list-style-type: none"><li>• Packet Sniffer / Wireshark Clone</li><li>• Port Scanner</li><li>• Twitter Threat Monitor</li><li>• IDS System</li><li>• Simple Vulnerability Scanner</li></ul>
