

WEBINAR ON POWER BI

In this three-day webinar, you'll be introduced to the fundamentals of Power BI Desktop, a free Business Intelligence tool from Microsoft that enables data loading, transformation, and visualization. Throughout the course, we will explore how to analyze data using Power BI Desktop by creating interactive reports and dashboards with ease and speed. You'll learn the foundational skills of importing, transforming, and visualizing data using this powerful software.

This webinar is designed for beginners who want to start their journey with Power BI Desktop. No specific prior knowledge is required—anyone with basic computer skills should be able to complete the course successfully.

Curriculum

Fees: 180/-

Power BI – Introduction & Setup

This module introduces **Business Intelligence** and Power BI, covering its components, practical uses, setup, data connectors, and comparisons between Free, Pro, and Premium versions.

Power BI – Query Editor

This section covers data transformation in Power BI, including using the Query Editor, managing data sources, refreshing data, and **Excel integration**.

Power BI DashBoard and Power BI Visualisation

This module covers creating and customizing **Power BI dashboards**, using charts, filters, and visuals for effective data presentation.
